

IMPROVED EFFICIENCY IMPACT ABSORPTION DEVICE.

19/975804

ABSTRACT

An improved efficiency impact absorption device
5 comprises a honeycomb (20) with a number of ribs (11)
defining respective outlets (12), with preferably
hexagonal section, terminating in holes (13), in the
lower part of the honeycomb (20). The honeycomb (20) is
injection-moulded in plastic, said plastic being chosen
10 from plastic resin derived from polycarbonate or
rubber-filled polypropylene.
